

action. New facilities will be constructed such that wetlands, except for a small area (less than one-tenth of an acre), are not encumbered. Sediment and erosion control measures for construction activities meeting federal and state guidelines outlined in the FEIS will ensure that temporary decreases in the quality of stormwater runoff during construction are minimal and temporary. Since existing facilities predate current stormwater regulations, implementing Best Management Practices required by federal and state permits will improve the overall quality of stormwater. There will be no significant impacts to groundwater or potable water resources as a result of the realignment.

The realignment will not significantly impact ambient noise levels or air quality. Temporary, localized noise impacts will occur, primarily from heavy machinery during construction and demolition. Compliance with the National Emissions Standards for Hazardous Air Pollutants (NESHAPS), the Toxic Substances Control Act, and the Florida Administrative Code (FAC) 17-296.810 will be effected during the removal of asbestos-containing material. Asbestos debris will be disposed of in accordance with NESHAPS and FAC 17-701. Lead-based paint will be disposed of in accordance with FAC 17-701 after sampling of the material is completed. NAS Pensacola is located in an area of full attainment for all criteria pollutants, thus an applicability analysis required by the General Conformity Rule under the 1990 Clean Air Act Amendment is not necessary. The action complies with the National Ambient Air Quality Standards (NAAQS). A minor source of air pollutants will be fire-fighting training, which is estimated to have total emissions of federal criteria pollutants of less than 16 tons per year (tpy), well below the Prevention of Significant Deterioration (PSD) limits of 100 and 250 tpy. Closure of NADEP and its associated emissions reductions will more than offset emissions of the realignment, and thus the action will not cause or contribute to exceedance of NAAQS.

The action will not adversely impact any Department of Defense Installation Restoration Program (IR) sites. While four IR sites do overlap areas proposed for the campus development, these sites will be remediated prior to construction and after their risk assessments for potential impacts on human health are approved by the EPA, the Florida Department of Environmental Protection (FDEP), and the Navy. In addition, one petroleum-contaminated site will be remediated in compliance with the

guidelines set forth by FAC 17-770 and will be constructed upon only after EPA or FDEP approval.

The net total population increase to the Pensacola region will be 5,122 persons, or less than two percent of the existing Escambia County population. This number represents a net quantity which accounts for both the loss of personnel from the NADEP closing and the incoming personnel from NAS Memphis. This increase is considered insignificant, especially when the enlisted student loading of 4,924, the majority of which will be housed on-base in bachelor's quarters, is considered. The action also provides 116 new family housing units at NAVTECHTRACEN Corry Station. No impacts to the area infrastructure or traffic is anticipated from the housing construction.

The increase in elementary, middle, and high school enrollment resulting from the realignment will have no significant impact on Escambia or Santa Rosa counties. Based on a recent survey by local school boards, the closure of NADEP may result in approximately 668 school-aged children leaving the region. Similarly, using population characteristics of other Navy training facilities, about 686 school-aged children are expected to enter the local schools as a result of the realignment.

Utilities at NAS Pensacola and Corry Station have adequate capacity to accommodate the new housing. The total demand for wastewater for the action is 0.9 million gallons per day (mgd) which increases the total base requirement to 2.1 mgd, below the total capacity of 2.35 mgd.

Potential impacts to cultural resources at NAS Pensacola have been evaluated in compliance with Section 106 of the National Historical Preservation Act (of 1966), as amended, and the Programmatic Agreement between NAS Pensacola, the Advisory Council on Historic Preservation (ACHP), and the State Historic Preservation Officer (SHPO). Results of the cultural resource survey conducted at Chevalier Field identified the previously recorded Commodore's Pond site and the historic Town of Woolsey. However, construction is not expected to result in a loss of cultural resources because all subsurface impacts beneath 40 centimeters will be monitored by a professional archaeologist; 40 centimeters is the thickness of the fill material overlying the site. In addition, subsurface testing will be coordinated with the SHPO to avoid or mitigate potential significant features.

Renovations for nine buildings in the vicinity of Chevalier Field include

buildings 18 and 52, located within the NAS Pensacola Landmark Historic District; buildings 606, 607, 627, 630, and 631, located within the proposed boundary increase; and building 225, which is an older building located outside of the district. No adverse impacts are expected during renovation work because the SHPO's recommendations for avoiding adverse effects to historic structures will be followed. These recommendations include leaving historic building exteriors intact and providing a 100-foot buffer zone between historic buildings and new construction. Also, proposed interior modifications will be reviewed by the SHPO prior to initiating work. In a letter dated June 6, 1994, the SHPO agreed that the renovations at Chevalier Field could proceed under the mitigation and monitoring guidelines outlined above.

Questions regarding the Draft and Final Environmental Impact Statement prepared for this action may be directed to: Commanding Officer, Southern Division, Naval Facilities Engineering Command, PO Box 190010, North Charleston, SC 29419-9010 (Attn: Mr. Ronnie Lattimore, Code 203RL, telephone (803) 743-0888, fax (803) 743-0993.

**Elsie L. Munsell,**

*Deputy Assistant Secretary of the Navy (Environment and Safety).*

#### **CNO Executive Panel; Closed Meeting**

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Task Force on Naval Surface Warfare Design will meet January 17-18, 1995, from 9:00 a.m. to 4:00 p.m., at 4401 Ford Avenue, Alexandria, Virginia. These sessions will be closed to the public.

The purpose of this meeting is to conduct discussions about advanced machinery and combat systems concepts. The matters being discussed constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and are, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact: Timothy J. Galpin, Assistant for CNO Executive Panel Management, 4401 Ford Avenue, Suite 601, Alexandria, VA 22302-0268, Phone: (703) 756-1205.

Dated: December 29, 1994

*Dennis J. Oppman,*

*Alternate Federal Register Liaison Officer.*

## DEPARTMENT OF EDUCATION

### Notice of Proposed Information Collection Requests

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed information collection requests.

**SUMMARY:** The Director, Information Resources Group, invites comments on proposed information collection requests as required by the Paperwork Reduction Act of 1980.

**DATES:** An expedited review has been requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget (OMB) has been requested by January 12, 1995.

**ADDRESSES:** Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street NW., Room 3208, New Executive Office Building, Washington, D.C. 20503. Requests for copies of the proposed information collection request should be addressed to Patrick J. Sherrill, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, D.C. 20202-4651.

**FOR FURTHER INFORMATION CONTACT:**

Patrick J. Sherrill, (202) 708-9915. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

**SUPPLEMENTARY INFORMATION:** Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 3517) requires that the Director of OMB provide interested Federal agencies and persons an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the

information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

Director, Information Resources Group, publishes this notice with the attached proposed information collection request prior to submission of this request to OMB. This notice contains the following information: (1) Type of review requested, e.g., expedited; (2) Title; (3) Abstract; (4) Additional Information; (5) Frequency of collection; (6) Affected public; and (7) Reporting and/or Recordkeeping burden. Because an expedited review is requested, a description of the information to be collected is also included as an attachment to this notice.

Dated: December 29, 1994.

**Gloria Parker,**

*Director, Information Resources Group.*

### Office of Educational Research and Improvement

Type of Review: Expedited

Title: National Assessment of Educational Progress (NAEP) 1995 Field Test and 1996 Full Scale Assessment and Background Questionnaires on Mathematics, Science and the Arts

Frequency: Biennially

Affected Public: Individuals or households

Reporting Burden:

Responses: 36,047

Burden Hours: 37,836

Recordkeeping Burden:

Recordkeepers: 0

Burden Hours: 0

**Abstract:** The National Assessment of Educational Progress (NAEP) is a congressionally mandated data collection of assessment and background information. Respondents include students in the 4th, 5th and 12th grades, teachers, school administrators, and parents. The 1995 NAEP was revised to include grade 12 Advanced Mathematics Teacher Questionnaire, the Individual Educational Programs (IEP) and Limited English Proficient (LEP) Questionnaire. Results of the assessments will be linked to the background characteristics of students, their schools, teachers and parents. Copies of the questionnaires can be obtained by calling (202) 219-1442.

Additional Information: Clearance for this information collection is requested for January 12, 1995. An expedited review is necessary to meet the mail-out date of the questionnaires. NAEP data are of vital importance to the President, Congress, and the National Education

Goals Panel, as well as State and local policymakers.

## DEPARTMENT OF ENERGY

### Notice of Floodplain/Wetland Involvement for Operable Unit 2 Remedial Action At the Fernald Environmental Management Project

**AGENCY:** U.S. Department of Energy (DOE), Fernald Area Office.

**ACTION:** Notice of Floodplain/Wetland Involvement.

**SUMMARY:** The Fernald Environmental Management Project (FEMP), located approximately 18 miles (29 kilometers) northwest of downtown Cincinnati, Ohio, is divided into five operable units which will involve various removal and remedial actions. The subject of this Notice of Involvement is Operable Unit 2. The purpose of the Operable Unit 2 Remedial Action is to reduce risks to human health and the environment. Operable Unit 2 is defined by five subunits or areas: the Solid Waste Landfill, Lime Sludge Ponds, Inactive Flyash Pile, South Field, and Active Flyash Pile. The proposed Remedial Action Alternatives for Operable Unit 2 consist of excavation and disposal of Operable Unit 2 waste in an on-property disposal facility. Waste exceeding waste acceptance criteria would be disposed of off site.

Excavation activities involving the Solid Waste Landfill, Lime Sludge Ponds, and support facilities (i.e., pipeline and haul road) would impact wetland areas. Remedial activities involving the Inactive Flyash Pile, South Field, and Active Flyash Pile could impact floodplain areas. In accordance with 10 CFR 1022, "Compliance with Floodplain/Wetland Environmental Review Requirements," DOE will prepare the respective Floodplain/Wetland Assessment for the Operable Unit 2 Remedial Action and the appropriate Statements of Findings. The proposed activities will be performed in such a manner to avoid or minimize potential harm to or within wetland and floodplain areas. Maps and additional information are available from the DOE at the address below.

**DATES:** Written comments must be received by the DOE at the following address on or before January 19, 1995.

**ADDRESSES:** Mail comments and requests for further information to: Mr. Wally Quaid, Acting Associate Director, Office of Safety & Assessment,
